

Nader Hayaux & Goebel contribute to Chambers “Renewable Energy 2025 - Mexico”

Category: Publications

written by Nader, Hayaux & Goebel | November 6, 2025

Mexico City, November 2025 - Nader Hayaux & Goebel (NHG) is proud to have contributed to the Mexico chapter of Chambers and Partners’ Renewable Energy 2025 Guide, authored by partners Javier Arreola and Santiago Medina, and associates Ana María Alpízar and Laura Villa. The publication analyzes Mexico’s new energy reform and its impact on the renewable energy sector.

The guide explores Mexico’s updated legal framework under the 2025 reform, the country’s commitment to carbon neutrality by 2050, and new investment opportunities in solar, wind, and clean hydrogen projects. It also highlights incentives for renewable generation and electric mobility.

NHG’s Energy and Infrastructure team combines regulatory, financing, and transactional expertise to advise on complex energy projects, including PPPs, project finance, and clean energy transitions. The firm’s participation in the Chambers guide reinforces its position as a leading advisor in Mexico’s evolving renewable energy landscape.
